Capabilities Statement

Oil City Iron Works, Inc. is a third-generation-owned and operated leading-edge metal casting and manufacturing company founded in Corsicana, Texas, in 1886. Our modern gray and ductile iron facility can take a project from blueprint to finished components. Our team of specialists produces quality engineered castings with an exceptionally high customer acceptance rate. Oil City Iron Works, Inc. strives for a safe, quality-oriented workplace that continually aims for total customer satisfaction.

Oil City Iron Works, Inc. has both green sand and no-bake mold line operations in a single 250,000-square-foot manufacturing facility that can produce machined castings from 5 to 8,000 lbs. Capabilities also include heat treating and surface coating. OCIW manufacturing is supported by leading Quality Assurance technology, such as MAGMA Flow software, Capture 3D scanning capabilities and in-house chemical/mechanical certification. OCIW has been in continuous operation since 1886.

Continuous Improvement through Employee Involvement and Customer Satisfaction

Core Competencies

- Foundry
- CNC Machining
- Heat Treating
- Surface Coating
- Pattern Shop
- Fabrication
- Non-Destructive Testing i.e. Capture 3D Scanning, MAGMA Solidification Modeling & Mag Particle

Differentiators

Oil City Iron Works, Inc. has been privately held and family-owned since 1886 and has operated in Corsicana, TX. OCIW is the largest gray and ductile iron non-captive foundry in Texas, serving both domestic and international customers.
